**Cockpit Freeboard: 31"**

**Rated: 900 HP Outboard**

**Fuel Capacity: 250 Gallons**

**10 Year Hull Warranty**

**GLASSTREAM POWERBOATS**

# STYLE

# PERFORMANCE

# VALUE

The 360 Pro-XS is a game changer: a performance based fishing boat of the first caliber, designed for the serious angler who wants it all, and a rig that will take the family out for a day of boating in total comfort. The best looking, riding and performing boat in this category. It's got it all, speed, economy of operation and price!

- \* FAMILY FUN AND FISHING
- \* LOW COST OF OWNERSHIP
- \* UNRIVALED HANDLING
- \* VENTILATED DUEL STEP HULL

In 1988 A.L. Kirkland invented the worlds first inverted, stepped hull for his race boat "Turn Of The Century." People thought: "It was just a fad." 30 years, later every modern performance boat uses a variation of that original design. The trademarked stepped hull radically improves handling and performance, reducing the amount of drag, initiating more lift. The end result a very fast, dry, soft ride.
